394933 Animals Layered Puzzle Set

More 3D Puzzle Beehive
 HABA education catalog p.23

394933

Animals Layered Puzzle Set

Where do milk and eggs come from? And who makes the delicious honey? The layered puzzle set appealingly provides basic knowledge about cattle, chickens and bees. The puzzle pieces show the habitat and stables of the animals, adult male and female animals as well as young animals. In the case of bees, individual tasks in the beehive and the development of a bee from egg to adult insect are also described.

Contents: 3 puzzles.

3 arranging frames, each with four puzzle pieces in different sizes. Material: Wood Dimensions of the frames: 20 x 20 cm. Age: From 3 years.

Features:

- robust wooden puzzles
- large pieces that are easy to place
- with great learning effect
- encourages cognitive skills, spatial awareness, and fine motor skills

395042 Birthday hedgehog

NEW

Happy Birthday

395042

Birthday hedgehog

To celebrate the big day, this cute hedgehog is decorated with 7 colorful spines with integrated elastic mechanism. These can be turned over to reveal a recess for a tealight. There is space in the stomach of the hedgehog for a photo of the birthday child (approx. 9 x 13 cm) or the matching birthday number and some decorations of small flowers, colorful stones, etc. After the celebration, all birthday numbers can be stored in the stomach.

Contents: 8 pieces.

Material: Wood Dimensions: Approx.
W 47 x H 38 cm; stomach cutout Ø 14.6 cm.

Features:

- reusable decoration for the birthday table
- individually customizable
- spines with recesses for electric tealights
- with removable colored wooden numbers from 1-7

Price: 25,85€

395335 „Rainbow“ birthday cover

395335

„Rainbow“ birthday cover

This beautiful cover quickly transforms simple chairs into a place of honor for the birthday child. The little sun reveals who it is for. Simply place a photo of the child or a name tag in the film pocket. One of the included number clouds can be attached to the rainbow for the age. Small surprises such as hand-painted pictures or greeting cards can be “hidden” in the mesh pocket on the back of the cover. After the birthday, this pocket offers space for the birthday numbers.

Contents: 8 pieces.

Material: Polyester; fabric-covered removable foam insert; number clouds with fluffy back.

Cover washable at 30 °C. Dimensions: Cover approx. W 48 x H 72 cm (incl. sun); mesh pocket approx. W 25 x H 16 cm; film pocket of the sun approx. 9 x 13 cm.

Features:

- long-lasting birthday decoration
- individually customizable
- suitable for almost all standard chairs
- including number clouds 1-7
- washable & dimensionally stable

384921 Bead Dance Placing Game

384921

Bead Dance Placing Game

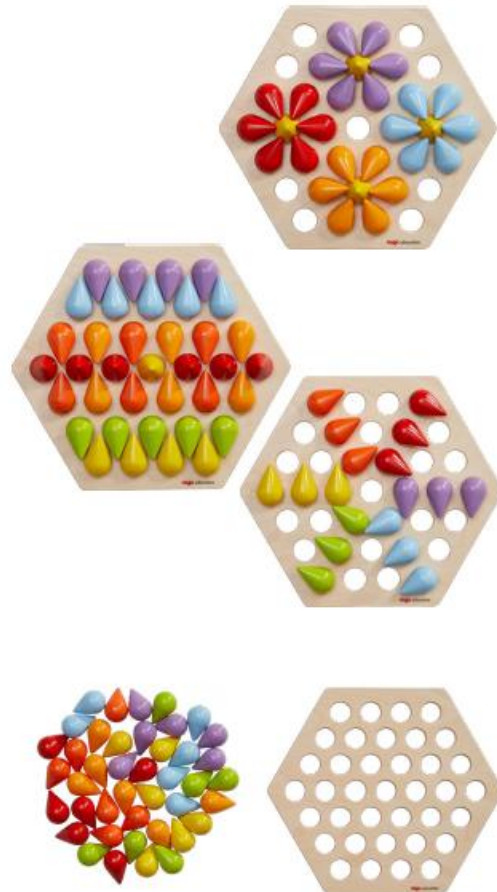

The beads dance here, regardless of whether one of the templates is used or an original pattern is created. The wonderfully colorful beads can be turned and tipped in all directions on the board. This means that imaginative new swirls of color, magical flowers or geometric figures can be created in no time at all.

Contents: 43 pieces.

42 beads in 7 colors, laying board
Material: Wood
Dimensions: Laying board 26 x 30 cm,
bead Ø at the bottom approx. 3 cm,
H approx. 4.6 cm.

Features:

- highly appealing thanks to the original shape and bright colors of the pieces
- wooden beads have a comfortable, pleasant feel
- encourages two and three-finger grip
- encourages fine motor skills, hand-eye coordination, spatial perception, color perception and creativity

392766 Owl Parquet

NEW

392766 Owl Parquet

When you see these funny owls, you simply have to pick them up. Their pleasantly smooth surface makes them fit comfortably in the hand and they are perfect for sorting by color, stacking, or re-combining into patterns and shapes over and over again. They all have the same shape and therefore fit together perfectly.

Contents: 24 pieces.

24 owls in 6 color combinations (corn yellow, orange, light green, Bordeaux, turquoise, dark purple). Material: solid beech wood.

Size: approx. 6,4 x 6,5 cm, 2,5 cm thick.

Features:

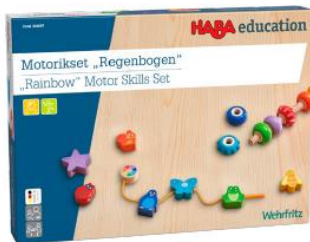

- owls, in 6 colors, printed on one side
- for placing, stacking and three-dimensional building
- long-lasting play and arranging fun
- also suitable for free play
- laying patterns encourages hand-eye coordination, fine motor skills, shape and color differentiation, creativity and concentration

HABA education
catalog p.18

394697

"Rainbow" Motor Skills Set

Peg, thread or screw – the Rainbow Motor Skills Set offers young children exciting play and learning opportunities: Line up funny animals on the threading string, place flowers, fruit and other shapes on the connecting rod, or screw round beads in various colors and with various surfaces onto the threaded rod. Each of the three motor skills games has different wooden elements, which invite children to play over and over again thanks to their bright rainbow colors. This sparks children's curiosity and playfully develops motor skills and the senses.

Contents: Pegging rod with base, threading string with threading rod, 7 different wooden elements for pegging, 7 for screwing, and 7 for threading
Material: Wood
Dimensions: Threading string 29 cm long; threaded rod 22 cm long; connecting rod 32 cm long.

Features:

- high-quality wood
- clear, distinct rainbow colors
- perfect size for small children's hands
- encourages gross and fine motor skills, movement coordination, hand and finger movement

409577 Bees motor skills screw board

409577

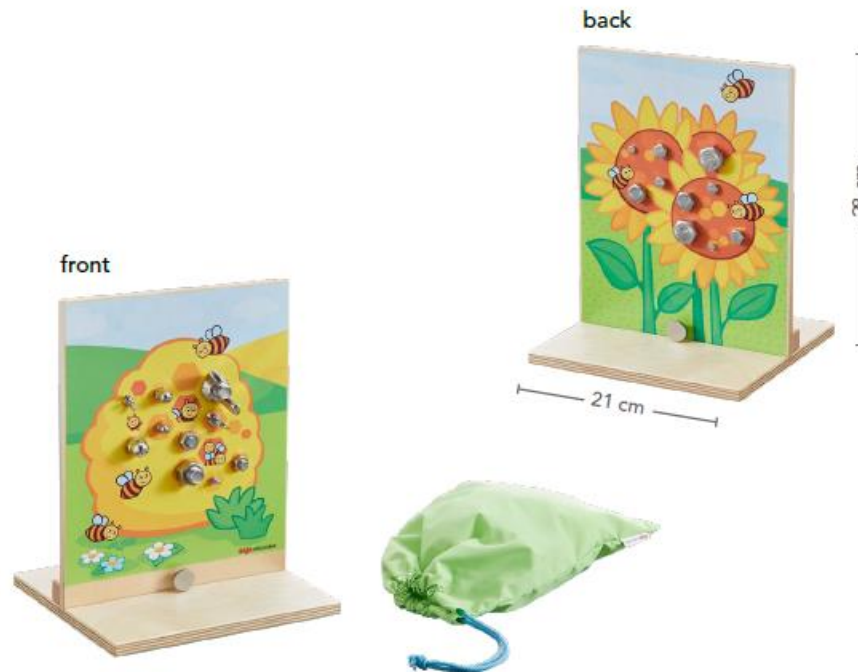

Bees motor skills screw board

No matter which side is used here, the challenges are the same. 10 holes with various diameters are waiting for the matching bolt and then the corresponding nut. If you want, you can sort what belongs together before screwing it into the board. Or you can just use trial and error until everything fits. Depending on the size of the bolts and nuts, the difficulty of screwing them together varies.

Contents: 1 base plate as a stand, 1 screw board with 10 holes, cloth pouch with 10 screws and 10 nuts. Material: Wood Dimensions: Screw board 21 x 28 cm. Age: From 3 years.

Features:

- printed on both sides
- high quality
- secure stand thanks to stable base plate
- contains wing, cap and hex nuts for varied motor skills training
- encourages hand-eye coordination, fine and grasping motor skills, hand and finger dexterity

395396 Digital Starter: Conditions and Loops

Digital Starter concept
HABA education catalog p.88

395396

Digital Starter: Conditions and Loops

Conditional commands and loops are central elements of computer programming. Players discover what these programming commands look like and how they work in this exciting dice game. Players roll commands such as IF-THEN or WHILE to move Cody, Pixi and WiFi around the game area. They playfully formulate their first programming commands in German or their native language and then in English. Who will be the first to get their figure to the goal?

Contents: 1 game board, 12 figures in 4 colors, 1 condition die, 1 standard die (1-6), 1 symbol command die (IF/THEN and WHILE), 1 command die (German), 1 command die (English), 1 counting loop die (with the numbers 2-3, light turquoise), 1 blank die, 36 die stickers in 6 languages, instructions.
Type: Educational game.

Features:

- playful familiarization with the functioning of computer commands IF/THEN and WHILE as well as the FOR and FOR EACH loops
- guaranteed playing fun when using and formulating computer commands
- high quality game material that encourages children to try things out

408775 Digital Starter: Path-finding algorithm

408775

Digital Starter: Path-finding algorithm

How can you find the fastest way through the park to the ice cream truck? Players solve this question with the path-finding algorithm game. To do this, they move their play figure over the path cards using waypoints and waylines. Each of these lines is associated with path costs, which the players must first estimate. But is your path actually the fastest one? Players find out when they turn over the path cards step by step to see the actual paths and path costs.

Contents: 21 path cards A (estimate side with turquoise lines), 21 path cards B (estimate side with green, beige and grey lines), 1 wooden box, 3 perforated plates (wood), 15 large template cards, 3 placement boards, 100 little paw chips, 16 waypoints, 48 waypoint tiles, 3 WiFi figures (corn yellow, lemon, light turquoise), 1 WiFi super sleuth dog (silver), instructions. Type: Educational game.

Features:

- playful familiarization with the algorithms that are also used in navigation systems
- three fun game variations
- high quality game material for plenty of playing fun

395366 Digital Starter: Neural networks

395366

Digital Starter: Neural networks

With an artificial neural network, a program can learn to distinguish cat images from other animal images, for example. Players vividly learn how to do this with a wooden laptop and two specified neural networks. They are first prepared for this task with training cards, by giving a different weight to the numerical information available on them in the neural network. After training, players test their artificial neural network. Can the wooden laptop use only the numbers printed on the test cards to tell whether the animal you are looking for is hiding underneath?

Contents: 1 wooden laptop (2.7 x 3.2 x 2.4 cm), 9 printed wooden pegs in 3 colors (corn yellow, light turquoise, lemon), 15 training cards (9 x 13 cm), 9 test cards (9 x 13 cm), 2 light and heavy neural network cards (57 x 24 cm), 3 animal coins, 2 symbol coins, 1 cloth pouch, instructions. Type: Educational game.

Features:

- playful introduction to the functioning of a neural network
- results can be easily read on a slider
- high quality game material that makes abstract calculations easy to experience

392764

Wobble Wood Spatial Positioning Game

There's a lot going on in Wobble Wood. Bright apples grow on the trees, a cute hedgehog sits underneath, and the little owl hides behind a bush – or should the owl be in front of the bush? In the Wobble Wood Spatial Positioning Game you have to look closely to make sure all the wooden pieces are where they're supposed to be at the end. But watch out – when the wobble lens is in play, things can quickly come tumbling down.

Material: Beech, Plywood, Cardboard, Cotton, cardboard. Game board dimensions: 25,8 x 25,8 cm. Players: 1-4. Age: 4 and up.

Features:

- high-quality material with pleasantly smooth surface
- various levels of difficulty
- encourages logical and spatial thinking, shape and color perception, concentration, dexterity and hand-eye coordination
